

Hot Press Launch Innovative New Products At Photokina.

UK based manufacturer Hot Press will be exhibiting their mounting and laminating consumables and machinery. The show will see the launch of exciting new products such as:

- New sizes of the popular JetMounter™ range of roller laminators.
- An innovative new solution for window graphics, WindowTac™. This optically clear film can be applied easily on-site due to its temporarily repositionable adhesive and a specially developed release liner which allows air bubbles to escape.
- Pressure sensitive laminates in new speciality finishes.

Visit us in **Hall 10.1 stand F021** to find out more about these products and others.
