The Inglet vertical cutter

Our new range of vertical saws, cuts virtually any substrate up to 22mm thick including MDF, acrylic, rigid pvc's, Dibond, foamboard and many others.

The Inglet cutter comes in four sizes, all using a unique circular saw design, is easy to handle and gives a smooth, clean cut up to 305 cm.

Now available in the UK exclusively from Drytac.

General features

- available in automatic and manual versions
- intuitive handling
- perfectly balanced cutting head
- built-in vacuum extracts up to 90 per cent of cutting debris
- 80-teeth circular blade mounted on silent-running motor
- cuts multiple layers up to 22mm thick
- precision-tabbed measurement guide
- nylon wheel guides for heavier materials
- compact vertical design saves space
- designed to the exacting standards of the CE

Electronic version features

- fully automated cutting head
- adjustable cut-advancement speed
- end of cut sensor
- cuts up to 305mm

Accessories

- pneumatic cutter for cardboard and foam boards, enables cuts up to 20mm thick
- laser guides for high-precision cutting
- additional 1 metre extension for even longer cuts

Come and see the Inglet in action at our Bristol showrooms...
