

CUTTERS & BENCHES

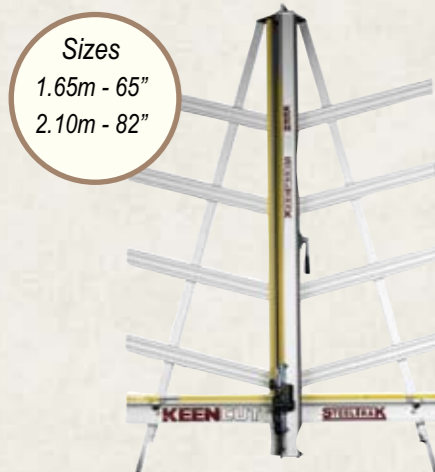

TECHNIC - ADVANCED ROTARY CUTTER

Made possible with the power of computer aided design, this patented "advanced rotary cutter" system eliminates the instability of overhead rail cutters. The unique sub-surface monorail bearing system gives a clear view of the cut line. The mechanism cannot distort under heavy cutting pressure. Two clamp rollers provide secure double clamping during cutting with up to double the gripping effectiveness of any other rotary cutter. The two tungsten steel cutting wheels give unrivalled performance and long life with two way cutting on every one of the 13 models in the range. The Technic is available in sizes from 30.5cm (12") to 305cm (120"). Models from 76cm (30") upward feature a wide entry clamp and an adjustable squaring arm as standard.

STANDS Stands are available for Tecnic Cutters over 30". Contact us for further details on 0117 958 6500

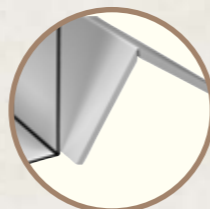

STEELTRAK ST165 & ST210

Sizes
1.65m - 65"
2.10m - 82"

Building on the huge success of the all-purpose Excalibur wall cutter, and recognising the increasing demands of thicker, tougher sign materials, this new vertical cutting machine is the best manual cutter on the market and offers exceptional value for money. It is strong, versatile, capable, easy to use, virtually maintenance free and built to last almost indefinitely. It must withstand the closest scrutiny, the toughest tests and deserve a place in every workshop".

All new patented V-GROOVE attachment!

EVOLUTION - HIGH PRECISION CUTTER BAR WITH INTEGRATED BASEPLATE

The Evolution cutter is an integrated wide format cutting system designed to revolutionise the speed, accuracy and convenience of the finishing process. Intended to fit any bench or attach to the purpose built Keencut Cutting Centre the all new Evolution shares the same outstanding 1:15000 straightness accuracy guarantee of the world renowned Javelin Xtra cutter bar. The unique four piece cutter slideway and torsion bar extrusion combines with the all new full length base plate to create a cutting machine that will meet the challenges of the most demanding operator and enhance valuable artwork.

JAVELIN XTRA - HIGH PRECISION CUTTER BAR

This precision wide format cutter bar is designed to exceed the most demanding standards of accuracy (1:15000). The accuracy of the Javelin makes it ideal for cutting banner materials, pop-ups and other display materials that require precise and accurate cutting for perfect alignment. The Javelin is equipped with lift stands to support the unit between cuts and enable easy placement of work. It is designed for use as a portable unit or located on an existing work table.

TEXTILE CUTTER - WILL FIT ANY CUTTER BAR

Using a razor-sharp ultra-thin circular blade the new Textile cutter will transform every Keencut Javelin, Practik, Max or Sabre into a machine that will cut the finest of flag, textiles and paper. Offering super straight cutting up to 5 metres long without fraying or rippling, the Textile Cutter offers a safe, sure way of cutting thin, high tensile and delicate materials that cannot be cut by conventional methods.

Attach in seconds to any Keencut cutter bar, past and present, with no tools. Economical disposable circular blades are available in packs of 10. An integral safety guard protects fingers when the Textile cutter is not in use.

STANDARD WORKBENCHES

The PROTEUS bench is a strong, elegant, modular system designed to enable any business, large or small, to specify and assemble the exact work, display or storage units needed to create a perfect working environment. As business grows and develops any PROTEUS structure can be re-configured and expanded, quickly and economically to work in complete harmony with the new demands. No extra tools are necessary, assembly is ultra-simple and the applications are endless.

SPECIALIST BENCHES

Please note that specialist benches for the evolution are also available. Please call us for more details.

BLADE SELECTOR

Code	Size	Description
CA50/019		Medium Duty Utility Blades - SteelTraK (all), Javelin
CA50/027		KEENCUT XR - Extra deep cutting (up to 13mm) - Javelin
CA50/027		Tungsten Carbide glass cutting wheel for SteelTraK

EVOLUTION

Code	Size
EVO160	1.6m (160cm - 64")
EVO210	2.1m (210cm - 84")
EVO260	2.6m (260cm - 104")
EVO310	3.1m (310cm - 124")
EVO360	3.6m (360cm - 144")

TECHNIC

Code	Size
