

SUPERJET™ CUT-SHEET MATERIALS

HOT PRESS

The SuperJet™ range of pressure-sensitive films is specifically engineered for use with the JetMounter™ laminator. Available in sheets rather than rolls, the materials listed here are the same quality pressure-sensitive products described on previous pages, but packaged for the convenience of users working in A4 and super A3 formats.

DOUBLE SIDED MOUNT FILM

A pressure-sensitive adhesive coated on either side of a clear 50 micron PVC film. Each side is protected by a paper liner. This film is ideal for pre-coating mounting boards in order to produce a self-adhesive mounting board.

MATT 75µ LAMINATE

This film is characterised by a full matt finish that completely eliminates reflections. It offers additional UV protection when used behind glass, yet is almost invisible. Matt film is most often used where lighting is unpredictable and uncontrollable, such as exhibition halls and other public areas.

SATIN MATT 50µ LAMINATE

This film is often used to laminate posters and prints, as its subtle finish closely mimics that of the printed piece. The satin sheen finish reduces glare, but does not reduce contrast, as the film is relatively thin.

ULTRA GLOSS 50µ LAMINATE

This ultra gloss polyester laminate offers a finish similar to Cibachrome™ prints. With the highest degree of gloss available, it delivers an almost mirror-like finish. This film is often used where impact and vibrant colours are the key elements of the artwork. For best results, it should be used only with ultra smooth boards.

FINE LINEN 90µ LAMINATE

This delicate, fabric-textured laminate is preferred by photographers wishing to impart a subtle yet decorative finish to their work. It is also useful for disguising minor creases and cracks in prints and posters.

SAND TEXTURE 90µ LAMINATE

This glare-resistant film is recommended for graphics that will be subjected to prolonged exposure in public places and exhibition halls. It displays a pleasing sandy texture that is also scuff resistant.

KID LEATHER 90µ LAMINATE

A soft PVC film embossed with a kid leather finish. This film offers an attractive, elegant look popular among wedding and portrait photographers. It is suitable for laminating all types of artwork.

CRUSH LEATHER 90µ LAMINATE

A soft PVC film embossed with a crushed leather finish. This film has a unique, opulent feel. It is suitable for laminating all types of artwork.

DOUBLE SIDED MOUNT FILM

Code	Sheet Size	Qty per pack
